

PreventiveRx Plus Drug List

Starting in July 2024, health coaching is no longer required to receive a medication incentive. Instead, all members who take certain medications to manage specific conditions will have a \$0 copay when they pick up their prescription at an in-network pharmacy. The PreventiveRx Plus benefit replaces the Value-based Incentive Design (VBID) program. Covered drugs include certain types of insulin, diabetic supplies, and antidepressants, along with several other medicines that treat asthma, high blood pressure, high cholesterol, depression, COPD, and osteoporosis. The following medications are included in the program.
